RE: Price Increase Notification

Nest3 Thermostat

Dear customer,

Our procurement team has established a new supplier and can confirm that stock is in transit. Unfortunately, due to this new arrangement there has been a small price increase.

Central Heating New Zealand wishes to advise that the Nest3 thermostat is no longer available from our current supply channel. Our stock has now sold through whilst we have been working on a solution.

The new code is NEST3S and has a list price of \$659.63 Ex GST effective today.

Stock is expected to arrive 2 weeks from today.

Please remove the previous code from your systems (NEST3).

When placing future orders please ensure the team use the NEST3S code.

We will send out new code templates to those customers that require them today.

Appreciate your support.

Kind regards
Paul Tonkin
