

Baxi Gas Eco4 System Boiler

Central Heating New Zealand is proud to introduce the Baxi Eco4 System Boiler which is ideal for smaller, more efficient homes. The Eco4 is smaller in size but competitive in price making it the most affordable boiler in our range. It takes up very little space in a home and can be installed in most places, including a garage or small cupboard in the house. The Eco4 boiler very low in noise but pushes out a lot of power and typically can heat up to a small 4 bedroom house when connected to radiators or underfloor heating.

The Eco4 boiler can easily be connected to a central heating hot water cylinder, providing hot tap water to the home. Using a gas boiler to heat the hot water can save up to 50% on hot water costs (natural gas) and provides amazing performance.

Ideal for radiators or underfloor heating providing premium whole home heating comfort with affordable installation and running costs.

A horizontal or vertical coaxial flue kit is connected to the boiler for convenient installation.

Requires room thermostat programmer (e.g. CHPRTB or similar).

A modulating gas valve enables power output to reduce to 6kW for very efficient operation.

Product Code	Style	Output	Dimensions
BX14E4	Baxi ECO4 System Boiler	14kW	730 x 400 x 299
BX24E4	Baxi ECO4 System Boiler	28kW	730 x 400 x 299
