

# Fernox System Treatments

## F1 Protector 500ml and 400ml

Protector F1 is the market leading inhibitor which protects against corrosion and limescale formation in domestic central heating systems. It is available in 500ml liquid bottles and 400ml express can. Protector F1 is suitable for use with all metals and materials commonly used in heating systems. For long-term protection ensure concentration levels are maintained and checked annually as part of the boiler or system service. Protector F1 is compatible with all other Fernox products.

- Protects against corrosion and scale in mixed metal central heating systems
- Makes transfer of heat around your system more efficient
- Stops frequent venting of radiators
- Prevents sticking pumps and boiler noise
- Reduces maintenance costs and saves on fuel bills
- Prevents cold spots in radiators
- Non toxic, environmentally friendly

### F1 Protector 500ml

The recommended 'in use' concentration of the product is 0.5%. One 500ml bottle will treat an average 4-bedroom house (100 litres/10 radiators). For open vented systems add via the feed and expansion tank. For sealed systems add via the radiator using a dosing pot or pressure pump.

### F1 Protector 400ml

One 400ml can will protect a large system (130 litres/16 radiators). Fernox Protector F1 Express Can is quick, simple with no mess and convenient for users. It is able to be dispensed directly into a radiator air vent or system filling loop using the appropriate special adaptor supplied with this product. The whole process will take less than two minutes.
