

DeLonghi Radiator Changes

Our DeLonghi radiators have had some minor changes this year for better value and performance

Old PHD 2.0 Radiator

— Old radiator packaging and plastic PHD insert.

New DeLonghi Radiator

— New DeLonghi Radiator packaging, silicon logo sticker. Valve provided separately and needs fitting.

What has changed?

- Plastic PHD insert has been removed.
- The integral valve is now supplied separately for better transport.
- The valve has a wider operating range.

Identifying the difference?

- PHD Radiator packaging clearly shows PHD 2.0 in gray, where the new DeLonghi radiator packaging has no PHD 2.0 label.
- New DeLonghi radiator has a new silicon "DL Radiators" logo on the side.
- New DeLonghi radiator has valve removed for safer transportation.

Everything else remains the same - flexible brackets, high gloss finish, high quality manufacturing and the amazing 25-year warranty.
