

EPOCA

Antique style in cast-iron durability

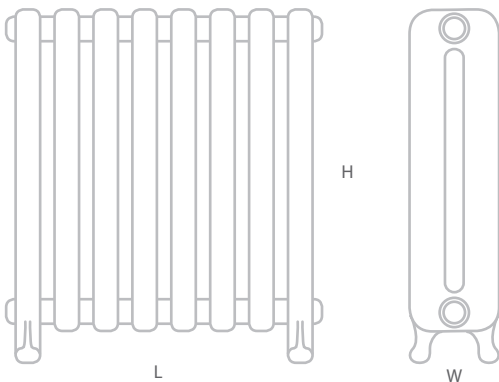

The Epoca Radiator by Baxi-Roca

From the classic style of the valves to the delicate details on the radiator body itself, the floor-standing Epoca radiator is a work of art. In addition to being an elegant source of radiant heat for any traditional setting, it is built to last a lifetime and more. Cast-iron radiators are known for their resistance to corrosion, which gives them nearly limitless life-spans.

Attention to detail on every part of the Epoca makes it the period-style radiator of choice for many with classic taste.

Available Models

The Epoca is available by indent order only and can be imported specifically for your project. It comes in 4-, 6-, 8- and 10-column models to suit the available space and output requirements of the room.

COLUMNS	DIMENSIONS (HxLxW)	OUTPUT WATTS*	WEIGHT (KG)**
4	838 x 308 x 187	727	63.4
6	838 x 461 x 187	1090	93.9
8	838 x 615 x 187	1454	124.4
10	838 x 769 x 187	1818	154.9

* Based on 90/70/20 flow/return/environmental temperature

** When filled with water
